- ✓ **Pre-construction heritage surveys** – to be completed early July. Works can start in all the investigated areas.

Did you know?

GPG Australia & Federation University joined together to offer a scholarship.

Scholarships worth \$575,000 over five years will be part of the Foundation Annual Appeal launched by Federation University Australia. This new scholarship program is one of the initiatives included in the Community Engagement and Benefit Sharing Plan associated with the Berrybank 1 Wind Farm, located in the State of Victoria

The scholarships to begin next year will support students to train using contemporary equipment such as laser alignment tools, diagnostic tools and working at height safety equipment. To be eligible, students from Federation will need to be enrolled in Higher Education or TAFE courses that have a direct relationship to workforce demands. When possible, priority will be given to female, indigenous and/or low economic profile students to facilitate their incorporation to the renewable energy sector.

The Foundation scholarships give students the chance to succeed in their studies without the stress of financial pressure, helping to cover costs including textbooks, petrol, groceries, and technology. Shaq Mohajerani, Head of Development APAC, attended the Foundation Annual Appeal event on behalf of GPG Australia, encouraging other companies in the sector to also support educational institutions as Federation University as well as local students in the region to ask for the scholarships that will be provided by the GPG Scholarship Fund.
