Crookwell 3 Wind Farm

Project Status

Wind Farm Planning:

- ✓ Upgrade of Graywood Siding Road & repairs to Woodhouselee Rd/Goulburn Rd – Woodhouselee Road repairs will start mid-July and Graywood Siding Road in August.

Activities on site

- ✓ Construction now estimated to begin at Q3 of 2022.

Did you know?

Naturgy and Ruralia create the first Spanish company for the comprehensive recycling of wind farms

The objective of this pioneering initiative is to recondition and value the largest possible volume of equipment, as well as components, materials and complete turbines for subsequent marketing. Among other processes, the recovery of fiberglass in blades, hub covers and hoods will be carried out to reincorporate this material into the market.

The General Director of Renewables, New Businesses and Innovation at Naturgy, Jorge Barredo, stated that “GIRA Wind was born with the aim of promoting the energy transition through the circular economy, and unlike other initiatives, it will provide a comprehensive solution to recycling and It will allow the integration of other companies and agents of the ecosystem in our value chain”.

Currently, park owners are required to bear the costs of dismantling and transfer to landfill. However, as of 2025, most of these materials will not be accepted at these facilities, offering a great opportunity to reprocess and recycle wind turbines from fiberglass to turbines and electrical equipment. This new Naturgy initiative is part of its commitment to sustainability and the circular economy, and is aligned with its 2021-2025 Strategic Plan, with which it will promote its role in the energy transition and decarbonisation.
