Crookwell 3 Wind Farm

Project Status

Road works:

- ✓ **Woodhouselee Rd/Goulburn Rd** – Expected to be completed end September.
- ✓ **Graywood Siding Rd** – Works in the intersection will start once Woodhouselee is completed.

Activities on site

- ✓ **Construction** estimated to **begin at Q4 of 2022**.

Did you know?

Discovering Careers in Renewable Energy Sector

Last month we were lucky enough to present to Catholic education teachers that came from all over NSW & ACT. This was organized through the Catholic Education Canberra-Goulburn Archdiocese. The theme of their conference was "you can't be what you can't see". The information we received from the Head Office in Canberra, and then our site visit really opened our eyes to the career possibilities our students - present and future- have before them. I had no idea of the wide range of career pathways that are available in renewable energy.

The Clean Energy Council have just released the Clean Energy Careers Guide which can be found if you follow this link...

www.cleanenergycouncil.org.au/advocacy-initiatives/workforce-development/careers-guide

The Clean Energy Careers Guide provides a snapshot of the roles and careers that exist in the Australian clean energy sector across wind, solar (both utility-scale and rooftop), hydro and batteries. It highlights where the demand for certain skills or experience is high and where a critical or niche skills gap exists and demystifies the pathways into a career in clean energy. It also provides insight into emerging career opportunities in technologies such as electric vehicles, bioenergy, offshore wind and hydrogen.

Our future depends on renewable and sustainable energy and therefore we are reliant on our students to find careers in this industry. Thank you GPG!", stated Cathy Bierman, Carroll College Broulee Coordinator.

GPG Australia firmly believes that the coordination and collaboration between the utility, industrial and education sectors is crucial to be able to appropriately cover all the needs in a continuous feedback loop and will continue looking forward for potential collaborations.
